Profile

Security-focused Full-Stack Developer with strong hands-on experience in the software development lifecycle. Specialized in Full-Stack Development (React.js, Node.js) with a core expertise in Application Security (AppSec). Expert in conducting Secure Code Reviews, white-box testing, and architecting hardened runtime environments. Beyond identifying vulnerabilities, I engineer secure-by-design solutions by mitigating root causes directly within the source code.

Skills

AppSec & Security

Secure Code Review,
OWASP Top 10, White-box Testing,
Vulnerability Management (Trivy),
Burp Suite, OWASP ZAP, RBAC.

Frontend Development

React.js, Next.js, Redux Toolkit, Tailwind CSS, React Query, Context API.

Backend Development

Node.js, NestJS, Express.js, Supabase, MongoDB, PostgreSQL, Python (Basics).

Tools & Infrastructure

Docker (Security), Linux (Bash), Git/GitHub, Postman, CI/CD Security.

Projects

Hardened Node.js Runtime Environment

Designed a secure containerization workflow for a Node.js application, focusing on attack surface reduction.

- **Optimization:** Migrated to **Alpine Linux**, reducing image size by **60%** and minimizing potential CVEs.
- **Access Control:** Prevented privilege escalation by configuring containers to run as **non-root users**.
- **Security Scanning:** Integrated **Trivy** to automate High/Critical vulnerability detection during build.

Tech Stack: Docker, Trivy, Linux, Node.js.

The Wild Oasis (Hotel Management System)

An internal hotel management system focusing on data integrity and secure role-based access.

- **Security:** Implemented **RBAC** via Supabase and applied strict **input validation** to ensure data integrity.
- **Architecture:** Developed a secure React SPA with efficient remote state management using **React Query**.

Tech Stack: React.js, Supabase (Auth/DB), React Query.

WorldWise (Travel Tracking App)

An interactive travel tracking application visualizing user footprint on a global map.

- **Protection:** Secured user routes and sanitized third-party API (Leaflet) inputs to prevent vulnerabilities.
- **State:** Managed global state securely via **Context API** to avoid data exposure issues.

Tech Stack: React.js, Context API, CSS Modules.

Education

Bachelor of Technology

Zagazig University

Major: Marketing & E-commerce Technology

Cumulative Grade: Very Good

09/2023 – Present

Zagazig, Egypt

Languages

Arabic – Native/Bilingual

English – Fluent
